

penergetic b

With the impulse of nature.

Kwa msisimko asilia

Take advantage of biostimulation with the Penergetic technology for active and fertile soil.
Faidika na teknolojia ya Penergetic ikupe mchanga wenye nguvu na yenye rutuba zaidi.

penergetic b promotes loose and air-permeable soils with easy cultivation in your farm. The product promotes the formation of humus and has a stress-relieving effect on the plants. The availability of nutrients is optimized and the roots grow stronger. This provides you with the best conditions for hardy plants and increased yields.

penergetic b hulainisha mchanga na kurahisisha kilimo shambani. Inakuza ongezeko wa mbochi na kupunguza madhara ya mazingira kwenye mimea. Huimarisha upatikanaji wa virutubisho na kumea kwa mizizi, matokeo ni mimea imara na mavuno mengi.

- ⊕ *Stimulation of soil microorganisms*
Huchochea ukuaji wa vijiumbe mchangani
- ⊕ *Loose, living soil and fewer weeds*
mchanga mwepesi wenye uhai na magugu machache
- ⊕ *Reduce fertilizer require*
Hupunguza matumizi ya mbolea
- ⊕ *Activates the decomposition of plant residue*
Inasababisha mabaki ya mimea kugeuka mbolea mchangani
- ⊕ *Increase water storage capacity*
Huongeza uwezo wa mchanga kuhifadhi maji
- ⊕ *Applicable on all soil and field types*
Inatumika kwa aina zote za mchanga na shamba

* Approved for organic farming in Switzerland in accordance with FiBL's list of operating resources

for soil

...for intelligent agriculture

Application interval Muda wa Matumizi

Apply at least 10 days before planting and immediately after harvest. It can be mixed with or applied with liquid or dry fertilizer*

Nyunyiza siku 10 kabla ya kupanda na baada ya kuvuna mazao. Inaweza kuchanganywa au kutumika na mbolea ya majimaji au kavu*

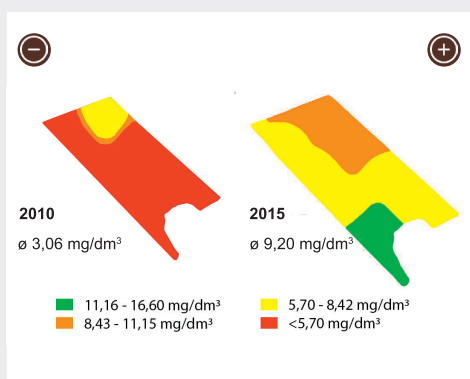

Application rate Uwekaji

200g per Acre or Mix 40g/20L of water
Spray on the soil

Gramu 200 kwa ekari moja ama Changanya gramu 40 /Lita 20 ya maji
Nyunyiza kwenye udongo

Phosphorus

Increase in average phosphorus content in soil.

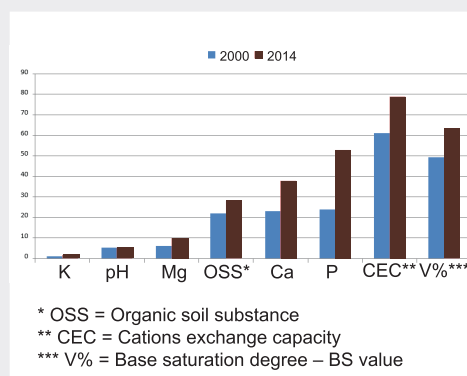

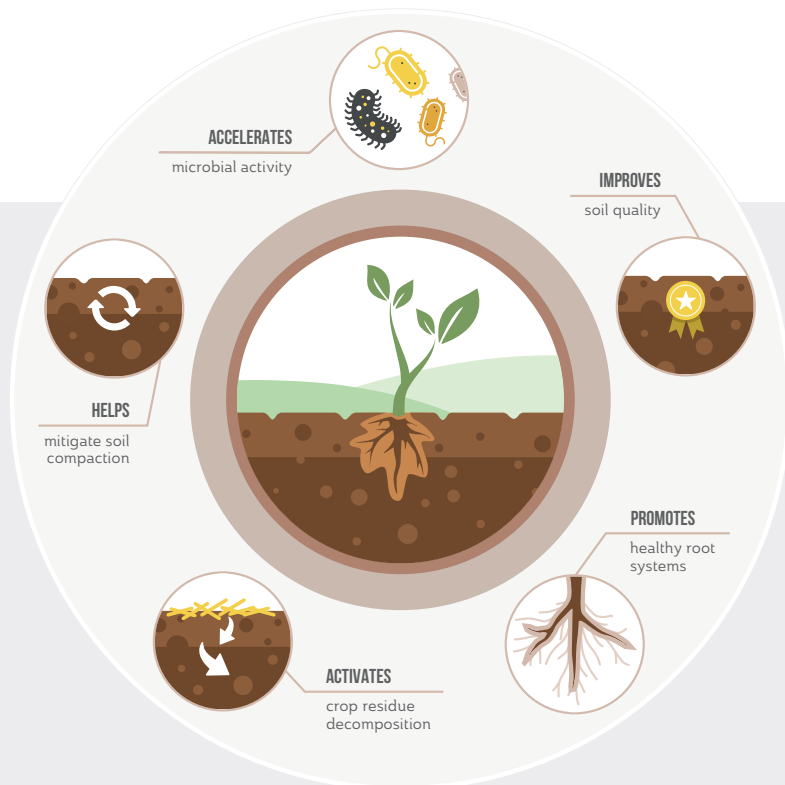

Huongeza kiwango cha madini aina ya fosforasi kwenye mchanga.

Soil consistency improvement Uboresha uwiano wa mchanga

Loosens compacted soils.

Inafungua chembechembe kwenye mchanga mgumu.

Soil fertility development Huongeza rotuba kwenye mchanga

Soil nutrients at 14th harvest without phosphorus fertilization.

Hali ya madhuni mchangani baada ya mavuno ya 14 bila kutumia mbolea ya fosforasi.

* For a mixture, the manufacturer's instructions must be observed. Further information can be found in our Instructions.
